

Product Manager

Background

2bPrecise was established to unlock the value of genomic data at the point of care. We empower physicians to realize the promise of precision medicine by making precision insights accessible within their workflow. Looking to make a dent in the universe? Your place is with us!

We are looking for a detail-oriented Product Manager who will help define and drive user stories within our product team. You need to be data-driven, passionate, and have excellent communication skills. You will need to communicate with different areas of the company and influence decisions without having actual authority. You will be asked to participate in customer calls to understand their problems and help define innovative solutions for the broader market. You must possess a blend of business and technical savviness and have a good eye for user experience as you will be guiding the development of product features. You will report to the Director of Product Management and work primarily with our engineering team.

Key Responsibilities

- Translate customers' problems into well-defined product requirements within user stories.
- Work with our UX team to validate design concepts with key internal and external stakeholders, collect UX feedback and drive open items to closure
- Work closely with our engineering team to present requirements and UX definitions, negotiate implementation tradeoffs, review test plans and be the gatekeeper before a feature is released to the market
- Work with our professional services team to understand implementation challenges and provide input on product-related issues.
- Analyze new areas, technologies, and market trends that might impact the product or become opportunities for additional value
- Analyze product usage patterns for understanding customer experiences

Requirements

- 3+ years of experience in software Product Management
- Excellent written and verbal communication skills
- Experience with agile development methodology
- Experience working with designers, engineers, and various stakeholders to coordinate, plan, execute, and track product releases from beginning to end
- Strong proficiency in Excel and PowerPoint
- Bachelor's degree in a technical field
- Comfortable with researching new technologies
- Willingness to travel to customer sites in North America and Europe

Advantages

- Healthcare industry experience
- Genetics and/or clinical background
- Software development experience
- SaaS product management experience
- MBA or entrepreneurial experience
- Familiarity with long term care facilities and nursing homes environments

General Information

- Full time position
- Language: Fluent English
- Location: Houston, TX
