

Software Engineer

Background

2bPrecise was established to unlock the value of genomic data at the point of care. We empower physicians to realize the promise of precision medicine by making precision insights accessible within their workflow. Looking to make a dent in the universe? Your place is with us!

We are looking for a talented software developer responsible for designing, writing, testing, and troubleshooting software for internal and external client applications.

Key Responsibilities

- Writes, debugs, documents, and tests software for Web and server applications according to business requirements.
- Works collaboratively with other developers, network and infrastructure administrators, DBAs, and project and product management to ensure the timely delivery of software.
- Utilizes SCM and SDLC best practices.
- Understands core business and recommends changes to improve the efficiency and effectiveness of products, as well as suggesting new products, processes, or tools to improve the core business.
- Partners with Internal departments to resolve customer issues.
- Maintains, monitors, and creates records and reports pertaining to projects.
- Is a point of contact for team member questions, issues, and escalations on projects.
- Regular attendance and timeliness.
- Other duties as assigned.

Requirements

- Bachelor's degree from an accredited institution is required, preferably in a technical field such as Computer Science, Mathematics, or Engineering.
- A minimum of 3-5 years in Software Development is required.
- Proficiency in C#, .NET Core/5+, Web and Console application development.
- Familiar with CSS, HTML, JavaScript, and Angular.
- Familiar with SQL Server, Database Modelling, and T-SQL.
- Familiar with MongoDB or other NoSQL databases.
- Direct experience with GIT source control systems required.
- Experience with CI/CD, Containers, K8s, and Helm.
- Effective organizational and time management skills.
- Able to communicate effectively, both written and verbal, with internal and external contacts.

Advantages:

- Experience with Scrum or other Agile project management methodologies is a plus.
- Knowledge of HIPAA and HITEC requirements is a plus
- Healthcare industry experience
- Genetics and/or clinical background

General Information:

- The position will be Full time
- Fully remote
- Location – Preferred Pittsburgh or Houston but can be anywhere central or east coast (EST or CST).
